ZAINULABDEEN NASEER NOORI

Backend Developer • Communications Engineer

Baghdad, Iraq | +964 771 903 5744 | zainnaser18@gmail.com

GitHub: zainnasseer

PROFESSIONAL SUMMARY

Communications Engineer building a strong backend development foundation with Node.js, expressJS, NestJS, and PostgreSQL alongside a solid engineering background in wireless systems, networking, and IoT. Seeking a backend developer role where I can apply analytical problem-solving and a builder's mindset to deliver reliable, well-architected services.

PERSONAL DETAILS

Nationality: Iraqi

Location: Baghdad, Iraq

TECHNICAL SKILLS

Backend Development	Node.js, Bun Js, NestJS, ExpressJS, REST APIs, JWT, bcrypt
Databases	PostgreSQL, MySQL, pgAdmin, MongoDB.
Languages	JavaScript, TypeScript, Flutter/dart, Python, C/C++, MATLAB, Assembly.
Tools & Workflow	VS Code, Postman, Swagger, Git, Github, Docker,Webhooks, integrating AI tools.
Engineering & Simulation	MATLAB, OptiSystem, network analysis using packet tracer and others.
Other	IoT , networking fundamentals, cryptography basics, AI.

PROJECTS

Backend REST API for e-commerce — express & MongoDB

Personal Project

Stack: expressJS, Node.js, MongoDB, stripe, bcrypt, JWT

- Built a modular RESTful API using the expressJS framework with a layered architecture following the framework's best practices.
- Used MongoDb as a non-relational database.
- Implemented secure authentication with bcrypt password hashing and JWT-based session handling.
- Role based resources access.
- Payment gateway integration.
- SMTP and OTP for secure login.
- Security best practices to ensure robust, seamless, and secure request/response process, using Headers protection and limiting DOS attacks.

Backend REST API — NestJS & PostgreSQL *Personal Project*

Stack: NestJS, Node.js, PostgreSQL, bcrypt, JWT

- Built a modular RESTful API using the NestJS framework with a layered architecture (controllers, services, modules, Interceptors) following framework best practices.
- Integrated PostgreSQL via TypeORM, designed relational schema, managed migrations and seeding.
- Implemented secure authentication with bcrypt passkeys hashing and JWT-based session handling.
- Role based resources access.

ESP32-C5 Wi-Fi Repeater *senior year project*

Stack: ESP32-C5, embedded C, Wi-Fi protocols

- Designing a dual-band Wi-Fi range extender on the ESP32-C5 platform.
- Working with low-level Wi-Fi APIs, NAT/NAPT routing, and embedded firmware development, with modern dashboard.

Flutter Mobile Weather App *university project*

Stack: Flutter, andrioid studio, openWeather API

- Designed a minimal weather prediction app using openWeather API as the source of data.
- Modern design with minimal dashboard to display most important data.

EDUCATION

B.Sc. in Communications Engineering

University of Information Technology and Communications (UoITC) — Baghdad, Iraq

- Specialization: Mobile Communications and Computing Engineering.
- Relevant coursework: Wireless Communications, Optical Fibre Communications, IoT Networking, Mobile app development ,Mobile Systems, Soft Computing (Artificial Neural Networks), Cryptography, Digital Signal Processing.

WORK EXPERIENCE

- Successfully passed summer training at ZainIq HQ with being on top 10 projects pitched in front of a specialized committee.
- Got the chance to overlook, learn, and solve real-life problems within many projects were under the development of colleagues.
- Self-training and practicing for a while.

CERTIFICATIONS & TRAINING

- NodeJS - Build a Full E-Commerce REST APIs.
- NestJS: The Complete Developer's Guide
- Other networking, AI, cryptography, software development workshops and Tutorials.

LANGUAGES

Arabic: Native

English: Fluent (spoken and written)
